Professional Summary

Frontend and React Native developer with 1.5+ years of professional experience. Shipped a cross-platform app to the App Store and Google Play as the sole frontend engineer (**1,500+ downloads**, **600+ concurrent users** at peak). Skilled in React, TypeScript, and REST API integration, and used to owning projects end to end for real clients, from production websites to internal business tools. Seeking a frontend or mobile developer role.

Skills

Frontend & Mobile: JavaScript, TypeScript, React Native, Expo, React, Vite, HTML, CSS, Tailwind CSS

State & APIs: Redux, REST APIs, API Integration, Token-Based Authentication

Backend & Databases: Python, Java, Kotlin, C#, PHP, ASP.NET, Laravel, MySQL, SQL

Tools & Practices: Git, Chrome DevTools, JIRA, Agile, Cloudflare, DigitalOcean, SEO, App Store and Google Play Deployment

Experience

Food Lion **May 2026 – Present**
Assistant Customer Service Manager *Concord, NC*

- Lead front-end operations during assigned shifts, supervising cashiers and office staff and upholding service, safety, and regulatory standards
- Train and coach new cashiers on register procedures and customer service
- Reconcile cash, research over/short discrepancies, support shrink prevention, and troubleshoot register and equipment issues

G&R Landmark LLC **Nov 2025 – May 2026**
Software Engineer (Contract) *Remote*

- Sole developer for a **revenue-generating home renovation business**, independently scoping, building, and maintaining its production website, internal tooling, and invoicing workflow
- **Production Website:** Designed and deployed a custom business site (*gr-landmark.com*) with a config-driven image gallery (including a fix for a stale **NodeList** filter bug) and a **Web3Forms** contact form, hosted on **Cloudflare Pages** with a custom GoDaddy domain and DNS setup
- **SEO:** Added geo-targeted metadata, **Local Business JSON-LD** structured data, canonical tag fixes, Open Graph tags, and a Google Search Console sitemap to improve local search visibility around Charlotte, NC
- **Internal Tooling:** Built an in-house **estimate generation app** to replace manual quoting, producing consistent client estimates and reducing administrative work; implemented a digital invoicing workflow to replace informal billing

Presale.Codes **Sept 2024 – Oct 2025**
React Native Software Engineer (Sole Frontend Engineer) *Remote*

- Built and shipped a cross-platform **React Native** app (iOS and Android) from scratch, reaching **1,500+ downloads** and **100–300 daily active users**, with **600+ concurrent users** during high-demand presales such as Bad Bunny and Beyoncé
- Built the full UI with **React Native**, **TypeScript**, and **REST API** integration (event listings, real-time search, event detail views, subscription-based content locking) alongside a senior backend engineer
- Resolved a critical cross-platform subscription failure by using **Chrome DevTools** and network logs to find schema mismatches between Apple and Google Play transaction IDs, restoring subscription revenue
- Improved load times and reduced crash risk at peak traffic via lazy loading and modular, on-demand components; added error handling and input validation, prioritizing stability fixes over non-essential UI work
- Implemented token-based authentication and published to the **App Store** and **Google Play**

Projects

Gym & Fitness Tracker (Capstone, Mohawk College) *Full Stack Developer* **Sept 2023 – May 2024**

- Led development of a full-stack fitness web app with **Laravel**, **PHP**, **JavaScript**, and **MySQL**: workout plans, progress tracking, calorie calculator, moderated forum, authentication, and role-based access control
- Deployed on **DigitalOcean** with XSS and SQL injection protections

Military Archive Facial Recognition (Applied Research, Mohawk College) *Full Stack Developer* **Jan 2024 – Apr 2024**

- Selected for an invite-only research course; built a full-stack AI app (**Python**, **SQL**, **Laravel**) matching living relatives to archival photos of Canadian military members, raising model accuracy to **80%** by curating and tagging training data

Education

Mohawk College, Hamilton, ON *Software Development Diploma* **Sept 2021 – Dec 2025**

- **Technical Mentor, New Developers Club:** Taught **100+ students** algorithms and Git; Social Executive, VR/XR Club
